

DATA CANOPY ACQUIRES ASSETS AND CLIENTS OF INTELISHIFT TECHNOLOGIES

COLUMBIA, MD December 2nd, 2019 – Data Canopy, a nationwide hybrid infrastructure provider has acquired Intelishift Technologies Government and all the assets and clients of Intelishift Technologies. The acquisition allows Data Canopy to consolidate all clients and services under the Intelishift Technologies brand to Data Canopy.

With the acquisition, Data Canopy now has ownership of Intelishift Technologies assets and clients, including those in the federal government, cyber security, and technology industries. Former Intelishift Technology clients will gain access to an expansive nationwide network of data centers, extended live support hours, and expanded dark fiber and network connectivity options.

“As a co-founder and one of the managing partners of Intelishift, I am very excited to start the integration of these two brands. Having been involved with both firms for over 10 years, it is an honor and pleasure to be able to support all our clients under one brand. I’m proud of the work that Intelishift Technologies has done and look forward to growing that foundation in the future,” said Ryan Barbera, CEO, Data Canopy.

“This acquisition greatly expands the level of support and service we can provide to our clients. We are excited to continue to grow our relationship with these clients,” commented Jennifer Herson, President, Data Canopy. *“Even better, the transition will essentially be seamless for clients as we consolidate to deliver enhanced service from individuals that each has long known and trusted.”*

“Bringing these clients under the Data Canopy umbrella will provide them access to 24x7x365 live support, as well as expanded data center, cloud, and network connectivity options – not only nationally, but internationally as well,” said CTO, Andrew Iwamoto, Data Canopy. *“With the established connections we have on the support team, our clients will be able to maintain and grow their infrastructure with confidence.”*

As noted, this consolidation of Intelishift clients and assets, gives clients access to national data center network and upgraded support opportunities while maintaining the trusted individuals who were at the core of Intelishift Technologies. *“I am very excited about the opportunity to reconnect with many of my old customers and reengage with a new and advanced data center portfolio. This acquisition brings high-end virtualization options and a true geographically redundant disaster recovery solution to new clients,”* said Adam Thomas, VP of Sales, Data Canopy.
