

DEDICATED SERVER INFRASTRUCTURE FOR MAXIMUM FLEXIBILITY

CanopyMetal

Bare Metal Solutions for Enhanced Control

Expand your secure, physical infrastructure without the burden of upfront expenses. Canopy Metal offers highly configurable bare metal servers from within Data Canopy's Tier III enhanced facilities so that you can get the dedicated resources you require with guaranteed uptime, security, and support.

Bare metal servers offer you flexibility to grow your infrastructure as you need without a long-term hardware commitment and are an excellent option for companies needing to host proprietary software, development environments, and more. Quickly deploy and scale to keep pace in a rapidly changing market with custom-fit server infrastructure ready to scale as you need it.

Silver	Gold	Platinum	Optional HDD Add-Ons
4114 10c 2.2 GHz CPU	6138T 20c 2 GHz CPU	8158 12c 3.0 GHz CPU	300 GB 15k RPM 6 GB SAS
16 GB RAM	64 GB RAM	128 GB RAM	960 GB SSD 6 GB Read Intensive
