

# HEALTHCARE DATA PROTECTION STARTS IN THE DATA CENTER

DataCanopy

Data protection starts at the foundational layer with a sound architecture strategy.

Data Canopy's experts can help you to select the right data center and cloud mix from its HIPAA/HITECH compliant infrastructure solutions to meet your regulatory and operational needs.

## Data Canopy Offers:

- Colocation from Tier III data center facilities nationwide
- Private cloud (VPS)
- Public and multi-cloud connectivity
- Storage and backups
- Disaster Recovery as a Service (DRaaS)
- Security as a Service (SECaaS)

## Disaster Recovery for Healthcare Organizations

Keeping your patient health records (EHR and EPHI) available and secure is one of the most important jobs of any healthcare organization. Data Canopy offers geographic redundancy and virtual solutions for your DR needs with HIPAA certified facilities nationwide.

## Calculated Cloud Transition

The cloud genie is not going back into the bottle, but you can find ways to secure your sensitive data with a hybrid approach. Data Canopy experts and HIPAA/HITECH certified cloud solutions can help you to:

- Develop a cloud and DR strategy to meet HIPAA standards
- Protect PHI and PII while still maximizing cloud benefits
- Connect securely to public cloud providers, including AWS and Azure, at reduced cost
- Ensure continual infrastructure improvement to stay ahead of changing industry and regulatory demands

The right cloud strategy can help you to keep that data in the right hands.

## Hybrid Infrastructure for Healthcare Providers

Data Canopy works to reduce the cost and complexity of hybrid and multi-cloud environments by connecting, storing, and securing physical and virtual infrastructure under one invoice.
